**Abstract:** GST is a form of VAT that would consist each and every one of the indirect taxes into one right through all the region of India. That means each state will have the identical GST rate not like nowadays where the states can fix their individual rates. In uncomplicated terms, GST means the state will contribute to the Central Sales Taxes that it is presently getting fully through the center. The Center in return will allocate the Service Tax with the states.

Thoughtlessly forthcoming Goods and Service Tax is one of the innovative steps in the area of indirect taxes in the country past seventy years of independence. GST is in subsistence more than 150 countries of the world. It will taper economic space between producers and consumers as it will be only value addition. The idea of one country, one act and one enforced tax will be observe. It is predictable that, it will help to get better the production in the country as well as will be benefit to the consumers, as highest rate of GST is predestined. It will also facilitate to pass up the multiple taxation, processes, tax evasion etc. Government innermost GST and States GST. Therefore, in this investigate paper credible pros and cons about upcoming are discuss. The GST Bill has been accepted by leader of India on 3rd August 2016 in RajySabha and on 8th August 2016 in LokSabha with approval by more than 50 % of state legislation. It is expected that GST will be implement from 1st April, 2017.

**KEYWORDS:** Goods Service Tax, Value Added Tax, Government, Consumers.

### 1.Introduction

One of the major taxation reform in India --the Goods and Service Tax (GST) is every one set to incorporate State economy and improve overall development of GST strength of character create a single, integrated Indian market to generate the economy stronger. The carrying out of GST will direct to the eradication of additional taxes such as octroi, Central Sales Tax (CST), State-level sales tax / VAT, entry tax, stamp duty, telecom permit fees, earnings tax, tax on use up or sale of electrical energy, taxes on transportation of goods and services, etc. Thus avoid various layers of taxation that right now be present in India, GST is a entire tax charge on manufacture business deal and utilization of goods and services at a nationwide level. Through a tax acknowledgment method this tax is save on value-addition on and services at every step of vending or buy in the bring in chain. The system allow the get going of GST paid on the procurement of goods and services in opposition to the GST

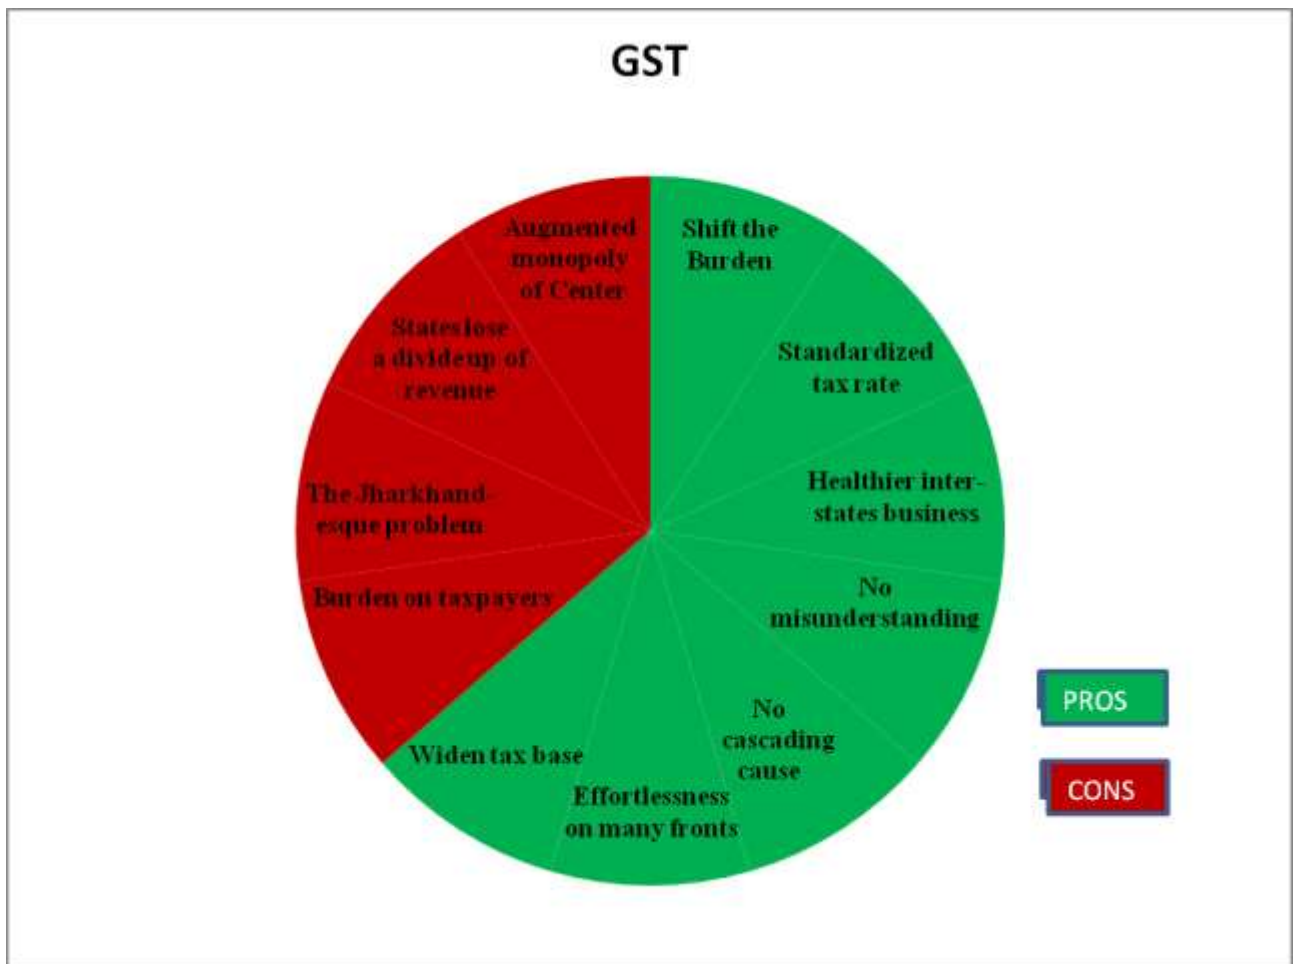

which is billed on the supply of goods or services. However, the ending consumers bear this tax as he/she is the last human being in the deliver chain. Experts say that GST is possible to get better tax collection and increase India's economic growth by contravention tax barrier linking States and integrate India through a identical tax rate. Under GST, the trouble of tax collected works will be alienated equitably between manufacturing and services, throughout a lesser tax rate by raising the tax base and minimize exemption.

**II. OBJECTIVES OF THE GST**

1. GST aims to eliminate barrier amongst states and unite the country into a universal national market.
2. To talk about pro and con of upcoming GST.

**IV. RESEARCH METHODOLOGY**

This research effort was fully base on secondary data from a variety of source like indication books, article from journalists, research papers, consultation in the parliament and a choice of websites.

**GST’S SEVEN „PROS“**

1. **Shift the Burden:** It will shift the burden of duty from the manufacture in India where the tax scheme is twisted towards the consumers. Manufacturers will give lesser taxes and there will be an atmosphere of larger competitiveness and more freedom in business.
2. **Standardized tax rate:** Would you not reduce your rates to be a focus for more people towards your goods if you could? Likewise to be aggressive states sometimes cut the VAT rates. This is to pull towards you more investor in line with the human being nature, cause a defeat of income to both the states and the center. standardized rates will make sure this problematical fiasco.
3. **Healthier inter-states business:** At present there is no tax credit provide for inter-state trade and therefore the same rates across all the states would make better the deal in the country among different states. *This can constant be seen as union of the country by financial means.*
4. **No misunderstanding:** All misunderstanding as regards what is a manufacturing or service action will be removing. All monetary actions will be "monetary actions" only and will be tax.
5. **No cascading cause:** There will be no taxes on taxes. Just the once will there be a duty- a single indirect tax. There will be no gung-ho.
6. **Effortlessness on many fronts:** This will be easier to recognize, easier to manage and easier to distribute with. Aam Aadmi Party had through it a proposal point of oversimplification of VAT for the traders; such is the enormity of the difficulty. Hence ease of organization and perceptive will be of huge help.
7. **Widen tax base:** More public will pay taxes. The tax rates are abridged but the promising number of participant will put together for the loss, the government has suggested.

#### **GST"S FOUR „CONS“**

1. **Augmented monopoly of Center:** There will be still more centralization in economic matter. The Centre will attach the proportion of returns to be shared with the states. Thus self-government of states will be compromise.
2. **States lose a divide up of revenue:** Some of the state may still bear a loss on the financial credit of tax distribution and the center itself may make a decision on the one-time reimbursement. The government may raise the state taxes by 1-2 percentages to compensate them. However this is the uncertain slab in the way of this bill as fee will be a hurt in the ass.
3. **The Jharkhand-esque problem:** The states similar to Jharkhand which are further goods-determined and less significant services-determined will thus be giving out their sales revenue with the Center but don't have enough services to compensate like Karnataka. This is going to hurt some states.
4. **Burden on taxpayers:** The cash that was not in use from the producer less than the scheme of tax credit in GST will be improved from the consumers, which absolutely is a harmful for the "consumer community

## ADVANTAGES AND DISADVANTAGES OF GST

### Advantages

1. Simplified Tax
2. Digitized GST Process  
Registration
3. No More Tax Evasion
4. Uniformed Rates Across States
5. Boon for SMEs  
Costly
6. Common Man Benefits
7. Ease of Travelling
8. Generating Greater Revenue
9. Strict Rule

### Disadvantages

1. Petroleum Products
2. Multiple State
3. Professional Assistance
4. Computerized GST
5. Luxury Items to Get
6. Unstable Economy

### Conclusion

VAT has actually show a growth in several States and the Centre has correctly compensated to various States. The hit story would carry on by the execution of GST in India. There were hurdle and disturbance for execution of VAT in India. Tamilnadu was the last but before/State to put into action VAT. GST is an extension of VAT which includes services also. Early losses of income to States would be compensated by the Centre. When GST is implementing in excellent strength the revenue of both Central Government and State Government shall be growing in the long run. The main setback behind the execution of GST is payment due to difference between the Centre and States on the RNR ( Revenue Neutral Rate), put together and its legal amendment which is obligatory to be passed with two-third majority in both the house of Parliament and authorization by a uncomplicated popular by at least half of State assemblies.
